

# Assembling zazen Alkaline Water System with Glass Bottom Tank. Please follow these instructions (and ignore page 4 of the Installation & Care Guide)

- 1 Place tap through hole in lower tank with a silicon washer on each side. Screw magnetic back onto tap inside the bottom tank and tighten.
- 2 Place the lower tank onto stand.
- 3 Put pre-soaked Silver Stones and Mineral Stones into Glass Bottom Tank carefully.  
\*If you have Alkalinity & Anti-Oxidant Enhancer (AAE) balls sprinkle amongst the stones away from the back of the magnetic tap.
- 4 Screw the Multi-Stage Filter Cartridge into cartridge connector and sit in the top of the glass tank (filter will hang in lower tank).
- 5 Insert Ceramic Filter into the upper tank and place silicone washer\* on filter stem underneath the tank. Fasten on with filter nut\* and tighten.
- 6 Place the top tank onto the assembled bottom tank.
- 7 Fill top tank with 4 litres of tap water and pop on the lid.

**Note: It will take 1½ to 2 hours to filter the 4 litre top tank into the lower tank. Do this twice to fill your system.**

\*Washer & nut come with Ceramic filter
